Dear Furniture Retailers,

I am deeply disturbed by the continuing sales of furniture made from tropical rainforest wood by Pottery Barn. Earth's rainforests are fragile and vital ecosystems that sustain the majority of the planet's species diversity. Logging is the leading factor in the destruction of tropical

**Pottery Barn must stop selling furniture made of wood
logged from Earth's endangered rainforests.**

forests. The sales of tropical woods by your company contributes to global warming, violent conflict with and displacement of indigenous people, and to the ongoing mass extinction of species — estimated to be over 400 species extinctions daily! Companies should sell furniture made from more sustainable materials such as palmwood, bamboo, recycled materials and second-growth woods certified by the Forest Stewardship Council.

Please inform me of your efforts in this regard.

Sincerely,

Address
